

VocTech Seed Fund 2019

Ufi works to raise UK skills levels by promoting innovative digital solutions for adult vocational learning.

Technology can transform how vocational learning happens and 'scale up' this impact for better, quicker, digital learning.

VocTech Seed funds development and testing of creative projects with innovative ideas for vocational learning.

Projects must show good understanding of the vocational learning market and offer high quality learning solutions as well as technical developments.

We fund ambitious projects with the potential to reach large numbers of learners and a vision for their future route to market sustainability.

**Call open from 15 January 2019
to 8 February 2019**

Funding of up to £50,000 is available
for projects lasting up to 12 months

Open to all industries, sectors
and technologies
